

PELO

Hair care TIPS

Welcome You are Pelorized

We have put together some tips to help you manage your hair, whether you have received her as a wig or in bundles.

01 Brush your hair —

Brush your hair with a detangling brush before and after every use, do not forget to apply serum.

02 Washing —

Wash days are fun. We suggest a sulfate-free moisture rich or silky shampoo and conditioner.

03 Freeze Control —

Raw hair can be frizzy. The best way to manage frizzy hair is a good serum and regular deep conditioning.

04 Managing Flyaways —

In case of annoying flyaways from closures and frontals, please, use a wax stick or edge control to tame them down.

05 Storage —

Keep the hair in a nice silk bag after each use or wear a silk bonnet to retain moisture.

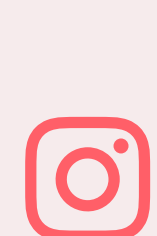

06 Specialized Care —

Blondes are more delicate than darker colors because of additional processing. So, be extra careful while washing.

“Your hair makes 90% of your selfies. Take care of it”
